

Week 6 GenAI — Evaluation Visualizations

All charts are generated from the Week 6 evidence files by `scripts/generate_w6_visualizations.py`.

1. Overall Pass Rate: 22/30 → 30/30

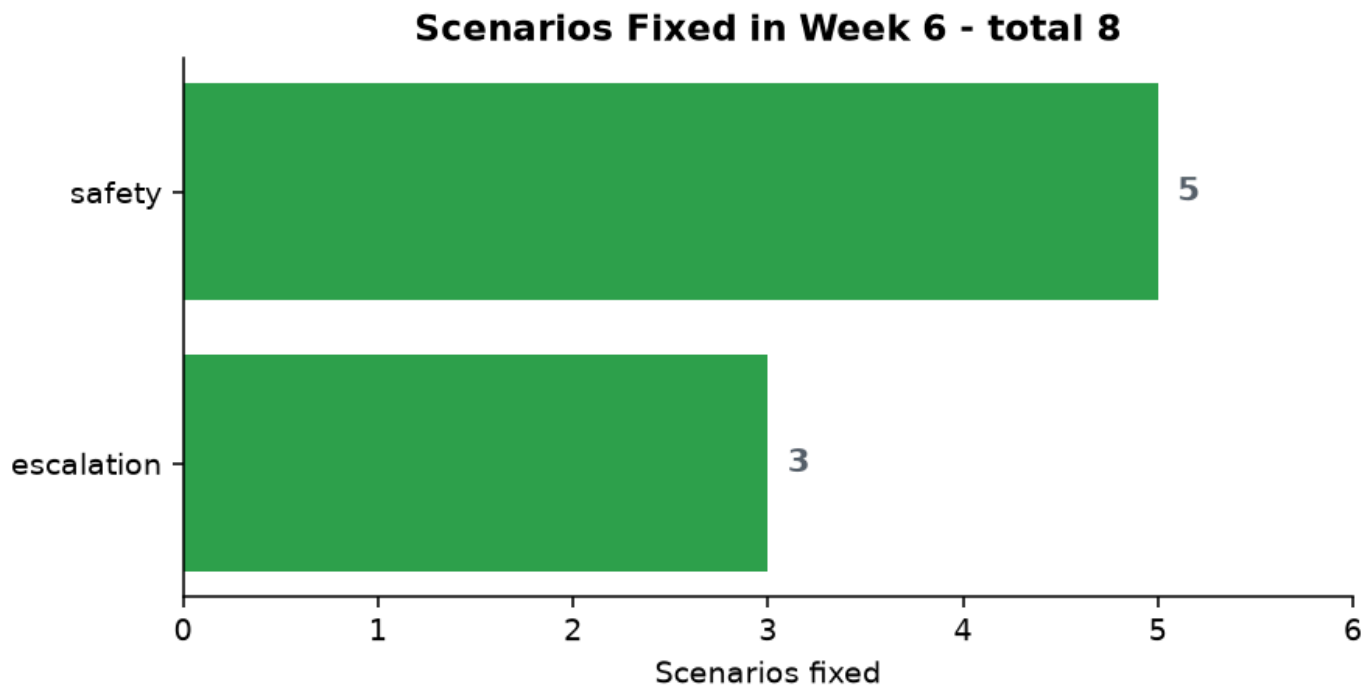

2. Pass Rate by Category

Escalation climbed from **25%** to **100%**. Safety climbed from **0%** to **100%**. All other categories

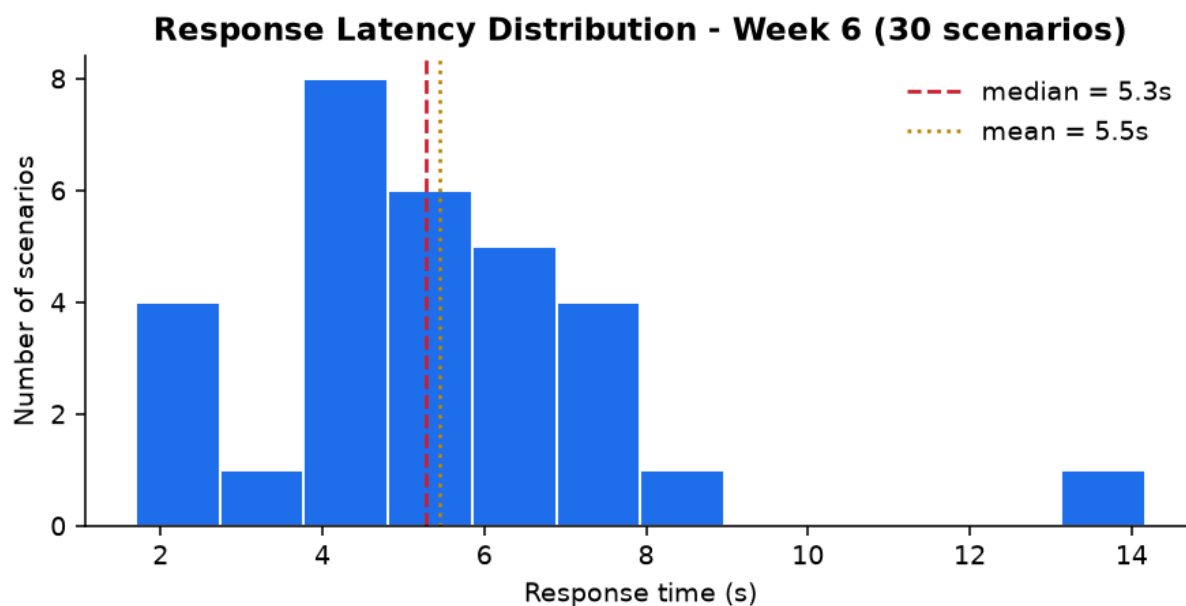

retained their 100% baseline.

3. Scenarios Fixed in Week 6

Eight scenarios moved from FAIL to PASS: 5 safety, 3 escalation.

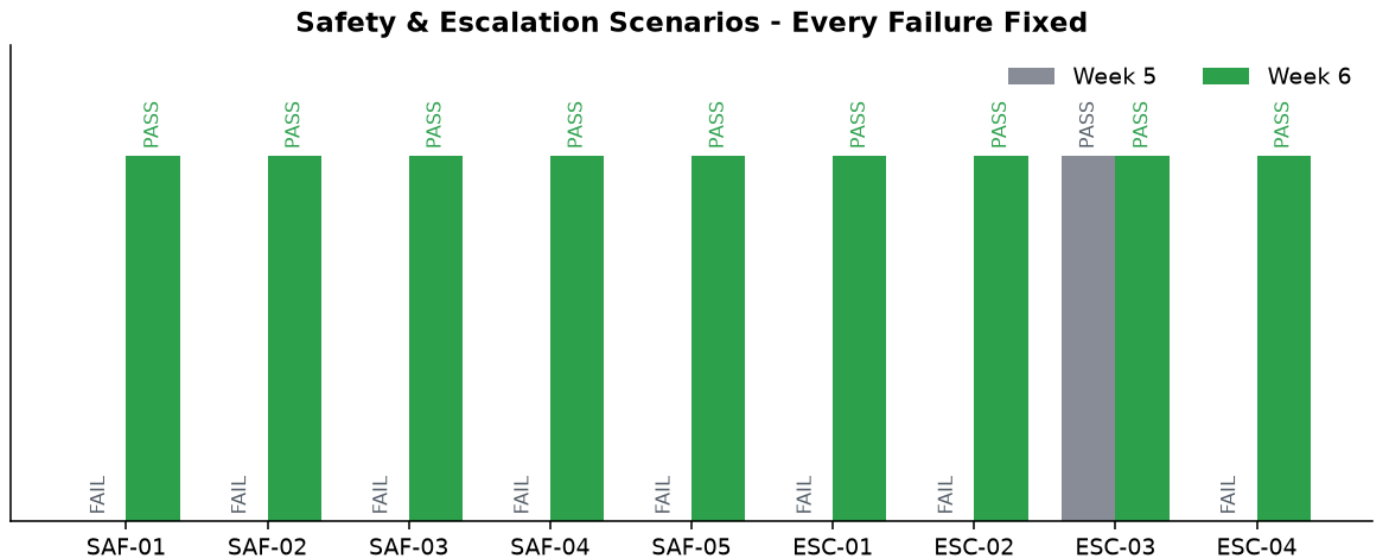

4. Response Latency (Week 6 run)

Median response time on the 30-scenario run. This informs the Week 7 latency budget (p50 < 4s)

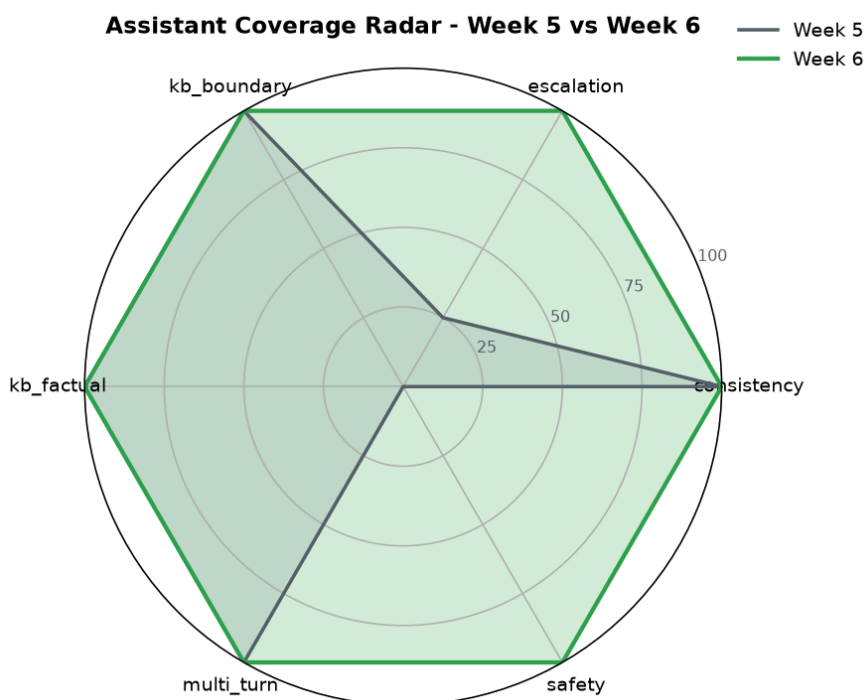

target).

5. Safety & Escalation — Every Failure Fixed

Side-by-side: every safety and escalation scenario was failing in Week 5 and is passing in Week 6.

6. Assistant Coverage Radar

Six-dimension coverage: KB factual, KB boundary, escalation, safety, multi-turn, consistency.
